POWER TOUCH GOLD RAZOR

HOW TO CHANGE THE BATTERY

This device is designed to be used with 1 AA (1.5 V) battery (not included). If the shaver motor starts running slower, or less efficiently, change the battery. To change the battery, turn the bottom cover as shown in the following image. Insert the AA battery, respecting the polarity and replace the bottom cover.

To change the battery

To insert the battery

Dispose of used batteries properly, use local collection and recycling facilities when available.

Nota:

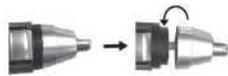

- The batteries must be inserted respecting the polarity.
- Used batteries must be immediately removed and discarded according to the manufacturer's recommendations.
- Remove the batteries when the device is not used for a long time.
- Do not short circuit the battery terminals or the contacts inside the compartment.

OPERATION

1. Remove the lid.
2. Turn on the shaver, you will hear the motor running.
3. Keep the razor close to the nostril or ear.
4. Cut only the hair that comes out of the ear or nostril.
5. Disconnect the device after using it and clean the brush head.

CLEAN THE RAZOR

1. The device must be turned off to clean it.
2. Remove the silver blade cover as shown in the following image to remove the blade (WARNING: YOU MUST BE VERY CAREFUL WHEN HANDLING IT, BECAUSE THE BLADE IS VERY SHARP).

3. Brush the blade and the adjacent area with the cleaning brush.
4. Assemble the razor again by repeating the process in the reverse order.
5. Clean the body with a soft dry cloth.
6. Do not use any detergent, solvent, or strong or abrasive cleaning product. Never immerse it in water.

Razor for wet and dry use
With nose / ear razor

USER INSTRUCTION GUIDE

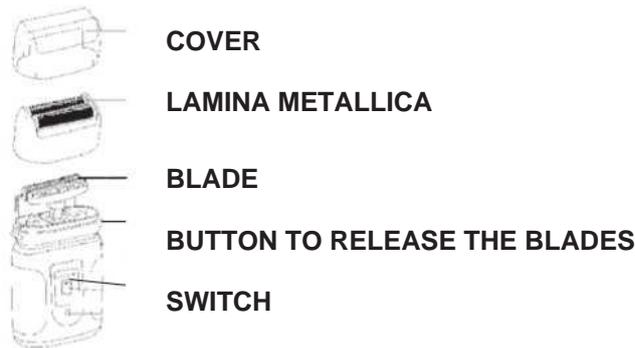

CAUTION

SAFETY INSTRUCTIONS

NOTE: READ ALL THE INSTRUCTIONS BEFORE USE.

1. As with all electrical devices, use the razor with caution.
2. If you used the razor in the shower or bathtub, be sure to rinse it properly and store it in a safe place.
3. Keep it away from heating devices or hot surfaces.
4. Never attempt to operate the shaver if it has fallen into water or a hard surface, or while the battery compartment is open.
5. Store the razor in a dry and cool place. Do not expose the razor to extreme temperatures, for example carrying it in the car during the summer.
6. After placing the batteries, make sure that the compartment is closed correctly and securely.
7. Make sure to dry your hands before placing or changing batteries.
8. Always make sure the shaver IS IN THE OFF POSITION BEFORE placing or changing the batteries.

POWER TOUCH GOLD RAZOR

TO SHAVE

If you have never used an electric razor, it will take some time for your skin to adapt to this razor. At the beginning it is possible that the skin becomes irritated and that it does not get a good shave as you would like. It is normal and the situation will improve over time. Wait two weeks to get used to the razor.

1. Remove the transparent cover from the shaver and switch it on.
2. Place the razor on the edge of the beard until it gently touches the skin, making sure the blades are in contact with the skin.
3. Stretch the skin with your free hand while sliding the razor continuously towards the first and second sides with short movements in the opposite direction to the growth of the beard. Keep shaving in this way until you are satisfied with the result.
4. NOTE: Do not apply too much pressure to shave. This could pinch the skin or pull fluff with the blades, which could damage or ruin them.
5. Clean the razor after use.
6. After you are finished shaving, place the shaver in the OFF position and put the protective cover back on.

CUTS

The razor has a wide sliding down trimmer, ideal for cutting moustache, sideburns or beards.

1. Slide the razor upwards to fully extend it.
2. Move the switch to the ON position; now you are ready to use the razor.
3. Approach the razor with the brush head down and the razor blade at right angles to your face.
4. Apply gentle downward movements. Keep cutting this way until you are satisfied with the result.
5. Move the switch to the OFF position and remove the razor by sliding it downwards.

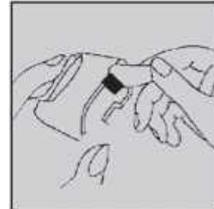

MAINTENANCE

CLEANING THE RAZOR

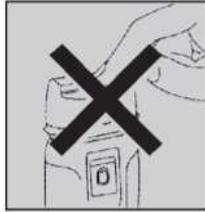

1. The razor blades accumulate cuttings of facial hair during use. For optimal performance, clean these parts after each use.
2. Since this razor is suitable for wet and dry use, you can choose to use the brush provided with the device or simply rinse the razor blades under a jet of water.
3. NOTE: When rinsing the razor with water, ALWAYS MAKE SURE that the battery compartment is closed securely and that the appliance is in the OFF position.
4. To clean the blades, remove the case that contains them by pressing the buttons on each side of the razor. Now you can remove the case. Simply remove all the rest of the hair and replace the case safely.

CLEANING THE RAZOR

1. For optimum performance, clean the remains of facial hair that remain between the teeth of the razor before or after each use.
2. If you want to cut a large amount of hair at once, clean the razor during the process.

TO KEEP IN MIND

The blades are pressure sensitive. **DO NOT** press or subject them to direct pressure.

DO NOT try to remove the blade case with a screwdriver. Use the buttons on each side of the razor for this purpose.
